

VIBE™ vs. BlueVibe™

Which wellness device is right for you?

MOST VERSATILE

VIBE™

Sixty protocols, one device — for a wide range of everyday wellness goals.

PURPOSE-BUILT

BlueVibe™

A single dedicated routine, built for cognitive support.

SIDE BY SIDE

	VIBE™	BlueVibe™
Built-in protocols	60 wellness protocols	One fixed protocol
PEMF frequency	1 – 1,000 Hz	Fixed 40 Hz
Blue light therapy	—	40 Hz blue light, paired with the PEMF
Field output	9 Gauss	12 Gauss
Daily routine	Flexible — pick the protocol that fits the day	One simple one-hour session
Designed around	A wide variety of everyday wellness goals	Cognitive impairment, especially with aging
Brain-focused options	Brain Balancing & Brain Fog protocols	Purpose-built for cognitive support
Clinically studied	Yes	Yes

Do I need both?

Not necessarily.

If you want one versatile device covering a wide variety of wellness goals — including Brain Balancing and Brain Fog — the VIBE™ is an excellent choice. If your primary focus is cognitive impairment, especially impairment associated with aging, BlueVibe™ was purpose-built specifically for that goal.

Many customers choose to own both, because they complement one another.

OPTION 01

Choose VIBE™

If you want one device for a broad range of everyday wellness goals.

OPTION 02

Choose BlueVibe™

If your primary focus is cognitive impairment.

OPTION 03

Choose Both

Use BlueVibe™ for cognitive support while using VIBE™ for its many other protocols.
